We manufacture Jewelry to order of any desired style or pattern.

Our workshop is one of the most complete in the West, and our workmen are thorough, each in his line.

We feel confident of our ability to turn out work equal in every respect to that made by the prominent manufacturers in New-York, Chicago, St. Louis or Cincinnati.

Our machinery is the latest and most approved pattern and our tools have been carefully selected, many of them having been made in our own shop for the purpose of manufacturing unique patterns of Jewelry. Our facilities therefore for the manufacture and repair of goods in our line are unequalled, and we can turn out work on the shortest notice.

We cordially invite the public to call and examine our stock as well as to inspect our workshop which is open during business hours, as it will afford us pleasure to explain to any and all callers the novelties and intricacies of Jewelry manufacture.

We are selling goods lower than the lowest, and cheaper than the cheapest.

Now is the time to make selections for the Holidays, which are close upon us, and for which we have made provision by adding to our stock late selections of new and stylish patterns.

An Indian Brave's College Career.

(Oxford Press)

One of the Indians who recently came to Lincoln University to receive an education, left about two weeks ago for his home in Utah valley, having become homesick. He was the nephew of a chief, and thought he did not deserve the honor which should be paid to a distinguished personage. This was shown by him more particularly towards Black Komas and the other Indians in the university. A few days before he left he became so indignant that he dressed himself in all his Indian toggery, put on war paint, and with knife and revolver in his belt, appeared in the presence of the faculty of the university, declaring his intention of setting off on foot for his home in the mountains. He was given a lecture, seeing that he was determined to go, prevailed upon him to wait until the next morning, when they would send him by railroad. Accordingly, the next morning Messrs. John B. Randall and Edward D. Blighham, two of the teachers, accompanied him to Philadelphia and placed him aboard the train bound for Omaha, in special charge of the conductor. He had been given a ticket at the university—seat of John J. Patterson. He was quite an apt scholar, and showed remarkable quickness of perception, having mastered the alphabet in a short time, and could understand many English words. He was always respectful to the officers of the institution, and only glib upon his dignity because his Indian companions had imbibed too much of our democratic notions, thereby failing to show him the difference the kinsman of the chief was entitled to.

To Corn Beef.

Pack the beef, cut into pieces weighing not over six or eight pounds, into a cask, using 2 pounds of salt to 100 pounds of beef. In front of two to four days the meat will be nearly covered with a brine composed principally of the blood which exudes from the animal, which will be drawn out by the action of the dry salt. Then take out the beef, rinse it well to remove all the blood, and repackage, using 4 pounds of salt to the 100 pounds of beef. Then take for each 100 pounds of meat, 3 pounds of salt, 2 ounces of saltpetre, 2 ounces of cloves, 1 ounce of Cayenne pepper, and 3 pounds of clean light sugar or three pints of molasses.

If the beef is not from a young animal add to the above two ounces of saltpetre. Dissolve the ingredients in water, lard and skin them, and pour over the meat, adding water enough to cover all well. A stone should be laid on the meat to keep it beneath the brine. The "drying" beef and tongues should be taken out in four weeks, washed and hung up to dry. Beef cured in this way will keep into hot weather. If the brine is drawn off in May and new put on, with 5 or 6 pounds of salt to the 100 pounds, adding also 1 pound of black pepper, the beef can be kept all through hot weather, though it will not be tender after the second brine is put on.

Country Hams.

"A Drop of Joy in Every Word."

Flemington, N. J., June 25, 1874.

Dr. R. V. Pierce, Buffalo, N. Y.: Dear Sir—It is with a happy heart that I pen these lines to acknowledge that you and your good men Medical Discoveries and Purgative Powders are passing to the world.

These medicines exceed all their highly praised, for they have almost brought me out of the grave.

Three months ago I was broken out with large ulcers and sores on my body, limbs and face. I procured your Golden Medical Discoveries and Purgative Powders, and took them daily, and in a short time I am in good health, all those ugly ulcers having healed and left my skin in a natural, healthy condition. I thought at one time I could not cure myself, although I can't poorly express my gratitude to you.

God's blessings rest on you and your wonderful medicines is the humble prayer of

Yours truly,

JAMES O. BELLIS.

When a medicine will promptly cure such terrible sores as these, free the blood of the virulent poison causing them, who can longer doubt its wonderful virtue?

Dr. Pierce, however, does not wish to place his Golden Medical Discovery in the catalogues, as it is a patent no man can claim.

He recommends it to others in sense, nor does he so recommend it, but what he does claim is this, that there is but one form of blood disease that it will not cure, and that disease cannot be removed.

He recommends his discovery for that disease, yet he knows it to be the most searching blood cleanser yet discovered, and that it will free the blood and system of all other known blood poisons, as they are known to him.

His discovery is warranted by him to cure the worst forms of Skin Diseases, as all form of blisters, Pimples and Eruptions, also all Glandular Swellings, and the worst form of Serofulosis and Ulcerated Sores of Neck, Legs and other parts, and all Serous Diseases of the Skin, Warts, Sore Throat, Fever Sores, Hip-Joint and Spinal Diseases, all of which belong to Serofulosis diseases, 123 East Kw-W.

Schenck's Mandrake Pills.

Will he possess to those qualities necessary to the total eradication of all bilious attacks, prompt to start the secretions of the liver, and give a healthy tone to the entire system. Indeed, it is no ordinary discovery in medical science to have invented a remedy for this stubborn complaint, which relieves all forms of bilious attacks, and is produced by a heretofore free use of calomel, a mineral justly dreaded by mankind, and acknowledged to be destructive in the extreme to the human system. That the properties of certain vegetables comprise all the virtues of calomel without its painful effects, is now established beyond a doubt, and rendered indisputable by scientific researches; and those who use the Mandrake Pills will be fully satisfied that the best medicines are those proved by nature in the course of her trials.

These pills open the bowels and correct all bilious derangements without salivation or any of the injurious effects of calomel or other poisons.

The secretion of bile is promoted by these pills, as will be seen by the altered color of the stools, and disappearing of the yellow complexion and cleansing of the tongue.

Simple directions accompany each box of pills.

Prepared only by J. H. Schenck & Son, at their principal office, corner Sixth and Arch Streets, Philadelphia, and for sale by all druggists and dealers. Price 25 cents per box.
